

**METRO ATLANTA**  
CORPORATE INNOVATION  
CENTERS

**MIDTOWN ATLANTA**

1	Accenture Innovation Hub	As one of ten Accenture Innovation Hubs in the U.S., the Atlanta hub is a destination where clients can co-innovate with Accenture teams to ideate, rapidly prototype and scale innovative products and services for the digital economy. Accenture's 30,000-square-foot innovation hub opened at the Centergy building in Midtown's Tech Square in 2018.
2	Anthem Innovation Studio	As Anthem's national digital hub, the Atlanta innovation studio is focused on enhancing the consumer health care experience, improving quality of care and lowering health care costs. Anthem's 6,500-square-foot innovation studio opened at the Centergy building in Midtown's Tech Square in 2016.
3	BlackRock iHub	BlackRock selected Atlanta in 2018 to establish its first innovation hub in North America. The asset management and technology solutions provider has two other iHubs in India and Budapest. The Atlanta iHub will grow to 1,000 employees. BlackRock employees were initially located in WeWork's location in Midtown's CODA building. In 2020, BlackRock moved into its permanent space in Midtown's 725 Ponce building.
4	Boeing Manufacturing Development Center	Located in Midtown on Georgia Tech's campus in the Delta Advanced Manufacturing Pilot Facility, Boeing opened an advanced research center in 2017. The team of Boeing engineers and Georgia Tech students focus on innovative factory automation solutions in aerospace.
5	Center for Global Health Innovation (CGHI)	The Center for Global Health Innovation is a 501c3 nonpartisan convener and catalyst to create compelling and equitable solutions for the world's greatest health issues. Across CGHI and their divisions, the center partners with more than 300 organizations across health, technology, life sciences, universities and multinational corporations to deliver innovative, data-driven, scalable solutions that make a difference in global health. Located in Atlanta, Georgia, they are at the nexus of collaboration, discovery and invention in public health – and establishing a vibrant life sciences workforce and talent pipeline for future generations.
6	Delta Air Lines "The Hangar" Innovation Lab	A team of 25 at Delta's global innovation center "The Hangar" harness research, design and technology to explore ideas that enable effortless travel. Delta opened the 6,500-square-foot space at the Centergy building in Midtown's Tech Square in 2016.
7	Global Center Medical Innovation (GCMi)	GCMi is the U.S. proving ground for global medical innovation. Their mission is to help direct the development, testing, training and commercialization of innovative medical products that improve quality based outcomes and delivery of healthcare for patients.
8	Honeywell Connected Enterprise	Honeywell, a Fortune 100 software-industrial company, opened its Midtown operation on Peachtree Street in 2018 with approximately 62,000 square feet. In 2020, Honeywell will double the space for a total of 124,000 square feet. The company's software innovation division - Honeywell Connected Enterprise is focused on connected technologies for buildings, industrial plants, workers, automobiles and aircraft. Honeywell's software engineers develop software products in the areas of IoT, mobile, cloud computing and data analytics, as well as marketing and user experience.
9	Invesco Labs	Invesco, a global investment management firm based in Atlanta, opened Invesco Labs in Midtown's CODA building in 2020. In this new space, Invesco's goal is to grow the Strategy Innovation and Planning (SIP) team which focuses on AI, emerging technology, and Intentional Innovation efforts across Invesco. Initial team members include full stack developers responsible for exploring solutions in AI, machine learning, blockchain, NLP, and virtual assistants. The Invesco Labs network includes existing spaces in New York, Houston and India.
10	Keysight Software Development Center	Keysight, the world's leading electronic measurement company, is focused on developing next-generation software for use in the design and test of electronic products being created by Keysight's customers around the world. In 2016, Keysight opened the center at the Centergy building in Midtown's Tech Square. In 2019, Keysight moved into 50,000 square feet at midtown's CODA building.
11	KPMG Ignition Innovation Lab	At KPMG's Atlanta innovation hub, developers, data scientists and information architects develop software and services related to data and analytics, mobile, taxes, human resources and cloud computing. The 22,000-square-foot KPMG Ignition Center opened on West Peachtree Street in Midtown in 2017.
12	NCR Innovation Lab	The NCR Innovation Lab keeps NCR at the forefront of new technologies and innovations including in the areas of artificial intelligence, mobile, big-data, cloud, machine learning and predictive analytics. The lab opened in 2018 within NCR's corporate headquarters on Spring Street in Midtown
13	The Home Depot Innovation Center	At The Home Depot Innovation Center, The Home Depot associates, and Georgia Tech students test and develop new technologies to advance retail, supply chain and more. The 6,500-square-foot innovation center opened at the Centergy building in Midtown's Tech Square in 2015.

**DOWNTOWN ATLANTA**

14	Deloitte iLab	The iLab is Deloitte Consulting's product development center for the Products & Solutions practice that houses prototyping, development and maintenance capabilities for multiple software technologies including wearables, machine learning, advanced analytics and social/mobile. Deloitte opened the 26,000-square-foot iLab in Downtown in 2014.
15	EY wavespace	EY opened its wavespace center in Atlanta in 2019 to help companies drive digital business transformation through an immersive experience. In wavespace, EY curates talent and technology, bringing them together in a collaboration proven to energize and align teams so they can solve problems and create outcomes that matter. The 3,598-square-foot Atlanta wavespace, located within the EY offices at 55 Allen Plaza, is part of EY's network of 20 wavespace centers around the world.
16	InComm Go Studio	Payments technology company Go Studio is an innovation hub dedicated to developing emerging technologies for customer-centric products and solutions, utilizing blockchain, artificial intelligence, voice assistants and more. The Go Sstudio opened in 2020 within the company's Downtown headquarters on Williams Street.
17	RICE Russell Institute for Entrepreneurship	The Russell Innovation Center for Entrepreneurs (RICE) was founded in Atlanta, Georgia, in 2018. It was created as a business generator, designed to inspire and support local African-American entrepreneurs as they innovate, create jobs and build wealth.

**SOUTH ATLANTA**

18	Chick-fil-A Innovation Center, aka "The Hatch"	Chick-fil-A's innovation center, called Hatch, is a 32,000 sq ft facility that is located across the street from the main campus. It is designed to be both a making space, where prototypes range from small-scale modeling, to full-size foam core installations, to virtual reality experiences, and a learning facility with immersive spaces dedicated to each step of Chick-fil-A's innovation process. The facility also includes project pods that teams can reserve long-term as they journey through their innovation project, and an onsite workshop where our designers and fabricators can create prototypes of all kinds in short order. Hatch is open to all Staff and restaurant Operators and consulting and facilitation services are provided in-house.
